## **Get The Train To The Station On Time**

### **Also Needed:**

**A large baseboard with one piece of  
Duplo train track attached to it.  
Enough spare track to complete it as  
far as the station (include bends etc  
to avoid obstacles)**

**Build the railway track and get the  
train into the station on time.**

# Toys - Shape

## Get the train to the station on time!

### Provide

*A large baseboard with one piece of Duplo train track attached to it.*

*A 'station' (model or drawn) at the other end of the board*

*Obstacles such as trees or tunnels can be drawn or fixed to the board as you wish*

*A train on the fixed piece of track*

*Enough spare track to complete it as far as the station (include bends etc to avoid obstacles)*

### Instructions

Attach one piece of track to the board and draw or place obstacles and the station on it as well. (It might be easier to lay a bendy track from one end of the board to the other, then draw or place the obstacles around it and dismantle it again.) Put the spare track beside the board. The competitor then has the time allocated to lay a track, avoiding the obstacles, and get the train to reach the station.

**Build the railway track and get the train into the station on time**
