

WALT Calculations can be done the opposite way to check

1. $6 + 4 = \dots\dots = \dots\dots - 4 = 6$

2. $7 + \dots\dots = 12 = 12 - \dots\dots = 7$

3. $10 + 6 = \dots\dots = \dots\dots - 6 = 10$

4. $9 + \dots\dots = 15 = 15 - \dots\dots = 9$

5. $8 + 3 = \dots\dots = \dots\dots - \dots\dots = 8$

6. $9 + \dots\dots = 14 = \dots\dots - \dots\dots = 9$

7. $12 + 5 = \dots\dots = \dots\dots - \dots\dots = 12$

8. $13 + \dots\dots = 19 = \dots\dots - \dots\dots = 13$
