

The Number Bond Pattern Machine.

/ /

Name: _____

By looking at the pattern of number bonds to 10 you can solve much harder maths problems—give it a go.

$6 + 4 = 10$

$60 + 40 = 100$

$600 + 400 = 1000$

$3 + \quad = 10$

$30 + \quad = 100$

$300 + \quad = 1000$

$\quad + 6 = 10$

$\quad + 60 = 100$

$\quad + 600 = 1000$

$2 + \quad = 10$

$20 + \quad = 100$

$200 + \quad = 1000$

$\quad + 5 = 10$

$\quad + 50 = 100$

$\quad + 500 = 1000$

$6 + \quad = 8$

$60 + \quad = 80$

$600 + \quad = 800$

$\quad + \quad =$

$\quad + \quad =$

$\quad + \quad =$

Look carefully!

Can you create your own problem here? Then how about having a go at problems to 10,000 100,000 or even 1000,000
