

Howdy partners, I love rounding up cattle but rounding up numbers can be tricky. Let me help you.

When rounding to the nearest 10, look at the units/ones and if it is 1,2,3 or 4 we round down. 5,6,7,8 and 9 we round up.

Round down to previous      Round up to next 10

When rounding to the nearest 100, we look at the tens. 10,20,30,40 we round down to the previous hundred. 50,60,70,80 or 90 we round up to the next hundred.
