

Coordinates & Fractions Game

In pairs or as a group, take turns to challenge each other with questions such as,

"One twelfth of this pie has been shaded. Where is it?"

The player answering would have to give the coordinates of that pie- in this case (1,2).

You could also ask percentage related questions such as,

"20% of this pie has been shaded. Where is it?"

Remember that there may often be more than one correct answer!
